Continuous whirl mixer 8-30t/h double joint, stationary

Technical data of the continuous whirl mixer

Version:	Double joint, stationary
Geometry:	Transport screw 3,5m Whirler 2,3m
Performance:	8-30t/h
Discharge height:	1,5m
Media:	Furan resin (2 components), 2 types of sand
Optionals:	Fully automatic flow control for binder, Temperature-dependent curing agent dosing, Dosing pressure monitoring, Collecting trays with integrated day tank
